PLANT QUARANTINE AND CONTROL ADMINISTRATION

SERVICE AND REGULATORY ANNOUNCEMENTS

LIST OF INTERCEPTED PLANT PESTS

(List of pests recorded during the period July 1, 1931, to June 30, 1932, inclusive, as intercepted in, on, or with plants and plant products entering United States territory)

FOREWORD

This is the thirty-eighth paper of a series issued under various names and at more or less irregular intervals and listing intercepted plant pests. The present list covers the nineteenth year of the period since the lists were started and includes intercepted plant pests for which determinations were received during the period specified, including those intercepted in, on, or with plants and plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not imported through customs, (4) offered for entry for immediate export or for immediate transportation and exportation in bond, and (5) in domestic shipments reaching the mainland from Hawaii and Puerto Rico.

The list is compiled in the Washington office from files maintained here. Much of the information summarized is furnished by inspectors and collaborators (State and customs officials) of the Plant Quarantine and Control Administration, hereafter to be known as the Bureau of Plant Quarantine. A large part of the insect determinations are made by specialists of the Bureau of Entomology and of the plant-disease determinations by specialists of the Bureau of Plant Industry. The States of California and Florida and the Territory of Hawaii maintain their own staffs of specialists and make many of their own determinations. Frequently the intercepted material is in a stage that is not determinable or is too badly damaged or is inadequate for determination. Many times the only organisms recognized are innocuous. Such interceptions, numbering some thousands, are omitted from the list.

As pointed out in previous lists of interceptions, statements as to the origin of fruits and vegetables carried as ships' stores, as well as of plants used for decorative purposes and of plant materials carried by passengers, can not always be verified, but every effort is made to give the origin of such plants and plant products as accurately as possible.

FRUIT FLIES

The following fruit flies were intercepted: Orange maggot (*Anastrepha ludens*) in mango, orange, sour orange, and sweet lime from Mexico; dark fruit fly (*A. serpentina*) in mamey and sapote from Mexico; Central American fruit fly (*A. striata*) in guava from Mexico; *Anastrepha* sp. in orange from Brazil, mango from Cuba, Jamaica, and Puerto Rico, guava from Guatemala and Puerto Rico, and avocado, grapefruit, guava, mango, orange, and sapote from Mexico; melon fly (*Bactrocera cucurbitae*) in cucumber and watermelon from Hawaii; Mediterranean fruit fly (*Ceratitis capitata*) in pear from Algeria, apple, *Sorbus* sp., and sweet lime from the Azores, loquat and papaya from Bermuda, persimmon from France, avocado, bell pepper, carambola, coffee berry, and mango from Hawaii, orange, peach, tangerine, and 1 adult and 19 pupae in shipments of oranges, tangerines, and sweet limes from Italy, grape, orange, peach, pear, and sour orange from Spain, and peach from Venezuela; pupa of *C. capitata*(?) on peach from Argentina; olive fly (*Dacus oleae*) in olive from Italy; *Rhagoletis cerasi* (Trypetidae) in cherry from France; apple maggot (*R. pomonella*) in tejocote from Mexico; *Rhagoletis* sp. in dried sour cherry from Italy and Yugoslavia.

[RAM. XII, 335]

MISCELLANEOUS INSECTS

The Asiatic rice borer (*Chilo simplex*) infested rice-straw packing from Japan. The avocado weevil (*Heilipus lauri*) and *Conotrachelus* sp. (Curculionidae) were intercepted in avocados from Mexico. The mango weevil (*Sternochetus mangiferae*) was taken in mango seed from Hawaii. The bean pod borer (*Maruca testulalis*) was intercepted in Lima and string beans from Cuba, in string beans from Dutch Guiana, Hawaii, Japan, and the Orient, and in green beans from Tahiti. *Laspeyresia splendana* (Olethreutidae) infested chestnuts from France, Italy, Japan, Portugal, Spain, and Switzerland. The sweetpotato vine borer (*Omphisa anastomosalis*) arrived with sweetpotatoes from China and the Orient. *Cylas turcipennis* (Curculionidae) was taken in sweetpotato from the Orient. The West Indian sweetpotato weevil (*Euscepes batatae*) was intercepted in sweetpotatoes from Argentina, Brazil, Jamaica, and Mexico.

The pink bollworm (*Pectinophora gossypiella*) was intercepted in cottonseed from the Bahamas, Egypt, India, and Mexico; and in seed cotton from Mexico and Syria. The Egyptian cotton bollworm (*Earias insulana*) arrived in packing material from Ceylon. *Apion carduorum* (Curculionidae) was found in globe artichoke from Belgium. *Brachycerus albidentatus* (Curculionidae) was taken in garlic from Italy, and *B. undatus* arrived with garlic from Spain. *Exosoma lusitanica* (Chrysomelidae) was intercepted in cipollino from Morocco. *Callosobruchus analis* (Bruchidae) infested chickpeas from India. *Stephanoderes coffeae* (Scolytidae) infested coffee berries from Angola. *Rhigopsidius tucumanus* (probably) (Curculionidae) was taken in potato tubers from Peru.

Psylliodes chrysocephala (Chrysomelidae) was intercepted in turnips from England and France. Rutabagas and turnips from France were infested with *Baris laticollis* (Curculionidae). *Ceutorhynchus picitarsis* (Curculionidae) arrived with soil around turnips from France. *Dialeurodes chittendeni* (white fly) was found on rhododendron leaves from England. The citrus black fly (*Aleurocanthus woglumi*) arrived on various hosts from the Bahamas, Cuba, Jamaica, and the Philippines. *Lepidosaphes philococcus* (Coccidae) was intercepted on cactus, *Cereus geometrizans*, *C. marginatus*, and *Cereus* sp. from Mexico. *Haplothrips bagnali* (thrips) infested cut flowers of *Ornithogalum* sp. from South Africa.

The sorrel cutworm (*Acronycta rumicis*) was intercepted on Manetti stock from France. *Agromyza pinguis* (Agromyzidae) infested witloof from Belgium. *Anthonomus rectirostris* (Curculionidae) arrived with *Prunus avium* seed from Austria. The Tahitian coconut weevil (*Diocalandra taitensis*) infested coconuts from American Samoa, Hawaii, and Tahiti. The sugarcane budworm (*Ereunetis flavistriata*) arrived with bananas, coconuts, and pineapples from Hawaii. Avocados and watermelon from Mexico were infested with *Marmara* sp. (Gracilariidae). The gypsy moth (*Porthetria dispar*) was intercepted on an ornamental plant from Japan. The European corn borer (*Pyrausta nubilalis*) arrived with corn from Canada and Italy and with leek from Belgium. Larvae of the Japanese beetle (*Popillia japonica*) and of *Aserica* sp. (Scarabaeidae) were intercepted in soil from Japan.

MISCELLANEOUS PLANT DISEASES

Among the more important and interesting interceptions of plant diseases made during the year were four new species of nematodes and new hosts and new countries of origin for others; the addition of Jamaica to the list of countries in which Lima bean scab (*Elsinoe canavaliae*) occurs; the interception of *Entyloma ellisii* on spinach from Cuba, apparently the first report of the disease in several years and first report from elsewhere than New Jersey; the first interceptions of *Mycosphaerella schoenoprasi* on leek tops from Japan, and of *Thielaviopsis paradoxa* in *Eleocharis tuberosa* and *Sagittaria sagittifolia* from China, apparently the first reports of the fungus for these hosts; and continued interceptions of citrus canker (*Bacterium citri*) from China and Japan.

Aphelenchoides (*Aphelenchus*) *fragariae* was intercepted from England[1] and the Netherlands; *A. parietinus* from China, Cuba, Denmark, Egypt, England, Germany, Ireland, Japan, Netherlands, Puerto Rico, and Sweden; *Aphelenchus avenae* from Denmark, Egypt, England, France, Germany, Italy, Netherlands, Puerto Rico, Scotland, Spain, Sweden, and Trinidad; *Aphelenchus* (n. sp.) from Jamaica in *Saccharum officinarum; Aphelenchus* sp. from Algeria, Germany, and Netherlands; *Cephalobus* (n. sp.) from Bolivia in *Begonia boliviensis; Cephalobus* (n. sp.) from China in *Colocasia esculenta; Hoplolaimus bradys* (n. sp.) from Jamaica on *Dioscorea* sp.; *Neotylenchus abulbosus* from England, Netherlands, and

[1] For details regarding these interceptions see lists under the countries named.

Sweden; *Tylenchus dipsaci* from England, France, Germany, Ireland, Italy, Netherlands, and Turkey; *T. pratensis* from Argentina, Germany, and Puerto Rico; *T. tritici* from China; *Bacterium citri* from China and Japan on Citrus spp.; *B. hyacinthi* from Netherlands on *Hyacinthus* sp.; *Ascomycetella* (n. sp.) from Cape of Good Hope on *Euphorbia* sp.; *Cladochytrium heliocharidis* from Netherlands on *Scirpus palustris; Coniothyrium hellebori* from Germany and Netherlands on *Helleborus* sp.; *Cronartium ribicola* from Nova Scotia on *Ribes* sp.; *Elsinoe canavaliae* from Cuba, Jamaica, and Mexico on *Phaseolus lunatus macrocarpus; Entyloma ellisii* from Cuba on *Spinacia oleracea; Melampsoropsis ilicinum* from Japan on *Ilex* sp.; *Mycosphaerella schoenoprasi* from Japan on *Allium porrum; M. tulasnei* from Wales on *Lolium temulentum; Mycosphaerella* sp. from Cuba on *Chayota edulis; Nectria* sp. from Cuba on *Chayota edulis; Oidium euonymi-japonici* from Japan on *Euonymus* sp.; *Phoma alliicola* from Italy on *Allium sativum; P. citricarpa* from China, India, and Japan on *Citrus sinensis; Phyllosticta argyrea* from England on *Elaeagnus macrophylla; P. epimedi* from Netherlands on *Epimedium* sp.; *Puccinia kusanoi* from Japan on Bambuseae; *P. ornithogali-thyrsoides* from South Africa on *Ornithogalum* sp.; *Sclerotinia minor* from Belgium on *Cichorium intybus; Sphaeronema* sp. from Denmark in *Beta vulgaris* and from Netherlands in *Allium cepa; Thielaviopsis paradoxa* from China in *Eleocharis tuberosa* and *Sagittaria sagittifolia; Uromyces colchici* from Netherlands on *Colchicum* sp.; and *U. astragali* from Russia on *Astragalus* sp.

AIRCRAFT INTERCEPTIONS

Ninety aircraft interceptions of insects were made. Among these were the following: Citrus black fly (*Aleurocanthus woglumi*) on coffee from Cuba; *Anastrepha* sp. (Trypetidae) in mango from Jamaica; *Coccus viridis* (Coccidae) on Cape-jasmine from Cuba and on *Citrus* sp. and mint from Haiti; *Frankliniella insularis* (thrips) on *Canavalia obtusifolia* and *Borrichia glabrata* from the Bahamas.

Only three interceptions were made of plant diseases on foreign plant material landed by aircraft—*Asterina* sp. and *Phoma* sp. on orchid from the Canal Zone and *Sphaceloma fawcettii* on *Citrus nobilis deliciosa* from Cuba.

COMMON PESTS INTERCEPTED

In addition to the pests named in the itemized list which makes up the body of this report, there were numerous interceptions of cosmopolitan pests that are more or less prevalent in this country. While it is true that many of these interceptions may represent forms or strains not yet introduced and potentially dangerous, it is not believed essential to the purposes of this list to include the details of their interception. They are, however, included in brief form in this preliminary text. Following each pest name are two figures in parentheses and separated by a dash, the first indicating the number of countries from which the pest was intercepted and the second the total number of interceptions. The customary data regarding this material are on file and available to anyone interested.

INSECTS

Aspidiotus camelliae (8—14), *A. cyanophylli* (17—31), *A. hederae* (23—187), *A. lataniae* (22—72), *A. perniciosus* (5—8), *Aulacaspis pentagona* (9—27), *A. rosae* (5—9), *Carpocapsa pomonella* (9—64), *Ceratiphis lataniae* (8—20), *Ceroplastes floridensis* (1—7), *Chionaspis citri* (14—38), *C. euonymi* (2—10), *Chrysomphalus aonidum* (33—278), *C. aurantii* (30—154), *C. dictyospermi* (30—129), *Coccus elongatus* (4—33), *C. hesperidum* (15—36), *Diaspis boisduvalii* (19—73), *D. bromeliae* (7—142), *D. echinocacti* (4—10), *D. echinocacti opuntiae* (5—9), *Ephestia* sp. (46—230), *Etiella zinckenella* (6—23), *Gnorimoschema operculella* (19—58), *Heliothis obsoleta* (8—125), *Hemichionaspis aspidistrae* (12—86), *H. minor* (13—167), *Howardia biclavis* (8—35), *Ischnaspis longirostris* (12—24), *Lepidosaphes beckii* (62—715), *L. gloverii* (14—151), *L. ulmi* (10—27), *Parlatoria pergandii* (36—245), *P. proteus* (9—42), *Pseudococcus adonidum* (13—42), *P. brevipes* (23—254), *P. citri* (22—68), *P. maritimus* (12—15), *P. nipae* (10—14), *Rhizoglyphus hyacinthi* (8—69), *Saissetia hemisphaerica* (9—28), *S. nigra* (5—72), *S. oleae* (11—22).

DISEASES

Actinomyces scabies (35—226), *Alternaria* sp. (17—94), *Aspergillus niger* (27—92), *Aspergillus* sp. (31—75), *Bacillus carotovorus* (31—170), *Bacterium tume-*

faciens (9—41), *Botrytis* sp. (19—97), *Caconema radicicola* (14—52), *Cephalothecium roseum* (16—29), *Cladosporium herbarum* (15—23), *Cladosporium* sp. (13—19), *Colletotrichum gloeosporioides* (18—72), *C. lindemuthianum* (9—34), *Diaporthe phaseolorum* (2—50), *Fusarium* sp. (47—473), *Macrosporium* sp. (18—23), *Oospora pustulans* (17—55), *Penicillium digitatum* (17—35), *P. italicum* (7—22), *Penicillium* sp. (47—491), *Phomopsis citri* (19—59), *Phytophthora infestans* (11—50), *Rhizoctonia* sp. (30—199), *Rhizopus nigricans* (19—48), *Rhizopus* sp. (15—27), *Spondylocladium atrovirens* (27—144), *Spongospora subterranea* (15—26), *Venturia inaequalis* (19—174), *Verticillium cinnabarina* (10—23).

CORRECTIONS

The following corrections should be made to List of Intercepted Plant Pests during the period January 1, 1930, to June 30, 1931: Under Mexico on page 312 *Anastrepha* sp. (Trypetidae) was taken twice in *Spondias* sp. (yellow plum) and not in *Prunus domestica* (plum) and *Prunus* sp. (yellow plum).

Noctuid	Cocos nucifera			1			Do.*
Parlatoria cinerea (Coccidae)	Citrus aurantifolia (lime)				1		Do.*
Pseudococcus sp. (Coccidae).	Cocos nucifera				1		Do.*
Ripersia sp. (Coccidae)	do			1			Do.*
Solenopsis sp. (ant)	Bamboo	1					Do.*
Stephanoderes sp. (Scolytidae).	Canarium sp		1				D. C.

List, by countries, of pests collected and reported from July 1, 1931, to June 30, 1932, inclusive—Continued

[All findings marked with an asterisk indicate State inspection]

Country of origin and name of pest	Host	Number of interceptions in—					Collected in—
		Cargo	Mail	Baggage	Quarters	Stores	
TAIWAN							
Insects:							
Parlatoria ziziphus (Coccidae).	Citrus sinensis (orange)				1		Calif.*
TANGANYIKA							
Insects:							
Phycitinae (Pyralidae)	In bale of sisal fibre	1					N. Y.
TASMANIA							
Diseases:							
Oospora sp	Malus sylvestris (apple)					1	Pa.
TOBAGO							
Insects:							
Acanthoscelides sp. (Bruchidae).	Dolicholus sp	1					D. C.
Aspidiotus sp. (Coccidae)	Astrocaryum tucuma (palm).		1				Do.
Conchaspis angraeci (Coccidae).	Diacrium bicornutum (orchid).	1					Do.
Diaspis sp. (Coccidae)	Astrocaryum tucuma (palm).		1				Do.
Nasutitermes costalis (termite).	Diacrium bicornutum (orchid).	1					Do.
Pseudopachymerus sp. (Bruchidae).	Rhynchosia sp	1					Do.
TORTOLA							
Insects:							
Acanthoscelides sp. (Bruchidae).	Dolicholus sp	1					Do.
Chrysomphalus sp. (Coccidae).	Mangifera indica (mango)	1					Do.
Curculionid	Dolicholus sp	1					Do.
TRANSVAAL							
Diseases:							
Oospora citri-aurantii	Citrus sinensis (orange)					1	Va.
TRINIDAD							
Insects:							
Acanthoscelides sp. (Bruchidae).	Dolichos lablab (hyacinth-bean).	1					D. C.
Do	Eriosema violaceum		1				Do.
Do	Peltophorum linnaei	1					Do.
Aspidiotus palmae (Coccidae).	Ficus benjamina comosa	1					Do.
Aspidiotus sp	Pentas carnea	1					Do.
Aulacaspis sp. (Coccidae)	Mangifera indica (mango)	2					Do.
Azteca sp. (ant)	Epidendrum sp. (orchid)	1					Do.
Corcyra cephalonica (Pyralidae).	Theobroma cacao (cacao)	3					Calif.*
Euxesta sp. (Ortalidae)	Citrus sinensis (orange)			1			Mass.
Heilipus rectirostris (Curculionidae).	Cinnamomum zeylanicum		1				D. C.
Lophocateres pusillus (Siamese grain beetle).	Phaseolus sp	1					Do.
Megacerus sp. (Bruchidae)	Ipomoea pterodes	1					Do.
Olethreutid	Theobroma cacao	1					N. Y.
Orthezia sp. (Coccidae)	Ixora sp			1			Mass.
Do	Pentas carnea	1					D. C.
Phelomerus aberrans (Bruchidae).	Cassia javanica		1				Do.
Phycitinae (Pyralidae)	Ananas sativus	1					Do.
Do	Zea mays (corn)			1			Mass.
Pseudaonidia articulatus (rufous scale).	Citrus grandis (grapefruit).	1					D. C.
Do	do					1	Mass.
Do	Citrus sinensis					1	Md.
Do	do					1	Mass.
Do	Ficus benjamina comosa	1					D. C.
Do	Mangifera indica	1					Do.
Pseudococcus sp. (Coccidae).	Ficus benjamina comosa	1					Do.
Do	Macfadyena corymbosa	1					Do.
